# BELLBOY WORDS

## ***Aqua . vit***

Flavoured spirit that is produced in Scandinavia, the main spice should be caraway or dill.

## ***Gen . mai . cha***

Japanese name for green tea combined with roasted brown rice. It is sometimes referred as "popcorn tea"

## ***Gren . a . dine***

A dark red syrup consisting of pomegranate, red wine, vinegar and raspberry jam.

## ***Jack . fruit***

Also known as jack tree, jakfruit, or sometimes simply jack or jak is a species of tree in the Artocarpusgenus of the mulberry family (Moraceae).

## ***Lem . on . curd***

A dairy product obtained by curdling (coagulating) milk with rennet or any edible acidic substance such as lemon juice or vinegar, and then allowing it to set.

## ***Mastika***

A liqueur seasoned with mastic, a resin with a slightly pine or cedar-like flavor gathered from the mastic tree, a small evergreen tree native to the Mediterranean region.

## ***Maté***

Is a traditional South American caffeine-rich infused drink. It is made by soaking dried leaves of the holly species *Ilex paraguariensis* in hot water.

## ***Or . geat***

A sweet syrup made from almonds, sugar and rose water or orange flower water. At BELLBOY, we use sesame based ingredients instead of the original ones.

## ***Rock Can . dy***

Formed by allowing a supersaturated solution of sugar and water to crystallize.

## ***Rooi . bos***

Meaning "red bush", a broom-like member of the legume family of plants growing in South Africa.

## ***Shrub***

In terms of mixed drinks, shrub is the name of two different, but related, acidulated beverages. One type of shrub is a fruit liqueur that was popular in 17th and 18th century England, typically made with rum or brandy mixed with sugar and the juice or rinds of citrus fruit.

## ***Sichuan pepper***

A spice commonly used in the Sichuan cuisine of China's southwestern Sichuan Province. When eaten it produces a tingling, numbing effect due to the presence of hydroxy-alpha sanshool in the peppercorn.

## ***Sobolo***

A refreshing drink native to Ghana. It can be made from either roselle leaves or flowers, a species of hibiscus that is native to West Africa. The leaves or flowers are steeped in hot water, and once the water has turned red, the water is strained, sweetened, and left to cool. Sobolo is typically dark purple-red in color, and the flavor can be described as something between grape and cranberry juice.

## ***Tereré***

An infusion of yerba mate (botanical name *Ilex paraguariensis*), similar to mate but prepared with cold water and ice rather than with hot water.

## ***Ton . ka***

Is a species of flowering tree in the pea family, Fabaceae. That tree is native to Central America and northern South America.

**I don't care how long it takes me,  
I'm going somewhere beautiful**
